C/M Knife Roller

For John Deere Corn Heads

The C/M Knife Roller kit is a complete interchange for the stalk rolls you are currently using on either 40 or 90 series JD Corn Heads.

New cast roller with 2 bolt on Knives with two cutting edges each. (Knives can be interchanged with CNH #86977538)

Blades are reversible and can be replaced individually without removing the stalk roll from the row unit.

The cutting edge of the knife is coated with long wearing tungsten carbide and heat treated making them extremely sharp and durable.

The coating on one side of the knife produces a self sharpening design that ensures consistent performance throughout the life of the knife.

Knife stalk roll are recommended for customers who demand aggressive residue processing across a broad range of conditions. This roller kit is not a substitute for a "Chopping Corn Head."

Open area between rollers during rotation allows stalks to travel up the roller, because of forward movement of the combine, and rotation of the gathering chain.
